

## Four cylinder, four cycle smoothness in a lightweight, compact engine

### A new generation of marine diesel engines

The new Westerbeke B advanced series engines have the smallest "envelope" available ("envelope" is the combined length, width, height). These lightweight low profile engines are designed to fit into the smallest of engine compartments. They are engineered by Westerbeke, pioneers in marine diesel engines, to provide consistent performance, quietness, durability and above all reliability, year after year.

The new B series engines are easy to install, economical to operate, and convenient to service. A full range of options is available allowing you to custom tailor your engine to fit your individual requirements.

Parts and service are available worldwide. Westerbeke engines and generators can be serviced by over 600 authorized dealers strategically located in major navigable waterways in the United States and Canada, as well as in 29 countries overseas.
